THREATS HAVE BEEN MADE

Against the Enterprise Mining and Coal Co. and Its Employees at Prada, Arkansas.

(Herald Special.)

Fort Smith, Ark., Oct. 21.—Arguments were heard in the federal court here today on the application for a permanent injunction to restrain the United Mine Workers from interfering with the operation of the mines of the Enterprise Mining and Coal company at Prada, Ark. The difference between the mining company and the miners' organization are of long standing and have led to frequent conflicts. In its application for an injunction the company alleges that threats have been made to destroy the mine and to do bodily harm to the non-union miners now employed there.

Victim of Drink Needs Orrine.

Drink cunningly destroys the will power, and while the drunkard wants to do what you tell him, he wants a thousand times more the drink that he craves. Medical treatment is necessary. Orrine will destroy the desire for liquor, so that the drink will not be missed and restores the patient to health.

This remedy is thoroughly scientific and is so uniformly successful that it is sold with a registered guarantee to refund your money if it fails to effect a cure. Booklet on "How to Cure Drunkenness," free on request. The Orrine Co., 710 Orrine Building, Washington, D. C. Sold in this city by Bratton Drug Co., 412 Spring street.—Adv.

Deaf as an Adder.

The expression "deaf as an adder" is from the Psalms of David, where it appears in the following form: "Their poison is like the poison of serpents. They are like the deaf adder that snappeth her ear, which will not hearken to the voice of charmers, charming ever so wisely." East Indian travelers tell us that there is a widely prevailing superstition in the east to the effect that both the viper and the asp stop their ears when the charmer is uttering his incantations or playing his music by turning one ear to the ground and twisting the point of the tail into the other.

Constipation is the rock that wrecks many lives; it poisons the very life blood. Regularity can be established through the use of Prickly Ash Bitters. It is mildly cathartic and strengthens the stomach, liver and kidneys. Bratton Drug Co., Special Agents.

A Sailor's Hands.

A sailor is betrayed by his hands, though his gait might betray him. They are permanently half shut. Walking, talking or sleeping the sailor has his hands half shut and could not open them if he tried. This is the result of years of climbing and pulling ropes.—London Chronicle.

The Joke on Her.

The Friend—Your wife doesn't appear to be in very good humor. Hus band—No; she thinks I've invited you to dinner.—Jean Qui Rit.

Dizziness, spells of blindness, headache and sour stomach are caused by torpid liver and constipated bowels. Prickly Ash Bitters removes the cause of the trouble and puts the system in perfect order. Bratton Drug Co., Special Agents.

BAIT FOR SARDINES.

Brattons Coax the Tiny Fish With Salted Eggs of the Cod.

Sardine fishing forms the chief industry of Brittany. In an average season the Brittany sardine fishermen catch 100,000,000 to 150,000,000 pounds of sardines, for which they receive anything from £300,000 to £600,000, while the shore industries dependent upon this fishery give employment to 20,000 other persons, mostly women and girls. So important is the sardine that in many communities in Brittany every person is directly or indirectly supported by it, and the failure of the fish to come means ruin, starvation and death to many people in the more isolated places.

Sardines are found on the coast of Brittany throughout the year, but flourish in greater abundance in summer and autumn. As many as 100,000 have been taken at one time in one net from one school. One remarkable feature of sardine fishing in Brittany is the enormous amount of bait which is used. The bait in general use is the salted eggs of the codfish, and it is estimated that the Breton fishermen pay £70,000 every year to Norway for cod roe for use as bait.

The casting of the bait, on the proper use of which a great deal of the success of the fishing depends, is always done by the captain of the boat, who stands on a little platform in the stern and while directing the movements of the boat and the manipulation of the net throws the bait to attract the fish. When the fish are on one side of the net or on the other his next move is to cast the bait in such a way as to cause them to rush against the net and thus become gilled.—London Tit-Bits.

Sardine Fishing.

In sardine fishing there are many uncertainties. There is a twenty-eight foot rise and fall of tide in the bay of Fundy, and especially constructed wooden picket inclosures are staked out in the water to gather in the fish. Last season a man erected an inclosure in what he supposed to be excellent fishing territory, but got nothing. He deplored his loss and for a time failed to go near it. "Why don't you seine it again?" somebody asked. "What's the use?" he replied. "Let me try it." the other persisted. "Yes, and you may have all the fish you get." The other man pulled out \$1,700 worth at one haul.—Frank Leslie's.
